EXPERIENCE

October 2020- Present	Flutter Development Intern/SDE-1, <i>YourStory Media Pvt Ltd.</i> Worked on the YourStory application, added multiple features as well as developed another photography platform app from scratch and launched it on Google playstore and apple Appstore. Built features like authenticating users through backend integrated with Firebase, Push Notifications, Rest API integration and logical state management with the help of BLoC architecture.
August- October 2020	App Development Intern, <i>Binary Dots Pvt Limited</i> Developed new user facing features for a society management application using Dart / Flutter framework, worked with RESTful APIs and GIT.

EDUCATION

BE in Electronics and Communication
2017-2021
Atria Institute of Technology, *Bangalore, Karnataka*
Aggregate GPA - 8.14

TECHNICAL SKILLS

Languages	Dart, Python, JavaScript, HTML, CSS
Technologies	Flutter, Firebase, Git, Node JS

PROJECTS

AquaStore	Released a virtual <u>Rain Water Harvesting App</u> on Google playstore called "AquaStore". It uses technologies like Geocoding, Geolocation, APIs etc. to provide an analysis of the amount of water that can be collected depending upon the user's location, roof size etc. It can also be used to view information as well as track the steps involved in building an RWH system. It also lets the users connect with vendors in the area who undertake the task of building such systems.
